Intelligent Household Control: Immax NEO

Welcome to the world of Immax NEO... a world where the household has justly got the smarter. A world in which the color of lighting is taking on a whole new dimension, one in which you feel completely safe n an environment where you are free to enjoy superb designs and relax in limitless comfort of the senses.

Introducing Immax NEO system allows you to control your home, smartphone, tablet or computer, alarm, cameras, or even door locks. Just a few clicks will illuminate your home with all your favorite colors and create the right environment for your every moment. Your apartment will be safe and you will have the perfect overview even when you are away It happened.

„We believe in perfect light it createsan unforgettable atmosphere.“

Our lighting systems bring a new dimension to interior lighting. They create a pleasant atmosphere, completing as well as enlarging interior spaces and are an originaland innovative element of every room. Immax NEO lighting systems are intended for everyone who would like to escape the mundane. We are the first in Central Europe to offer designer lamps and bulbs of very high luminosity with the choice of hundreds of color combinations.

„Close your eyes and imagine your home as a large painting canvas. Fantasy becomes your limitless muse with our products being the brush and paint.“

Immax NEO and NEO LED actuators and smart bulbs with features are able to shine in warm or cool tones, using white light and color as well as being able to flash or dim serenely. Immax NEO smart light bulbs are available in several shapes and different socket bases.

You may control all available functions of your smart lighting - variable light intensity, thermal color, light tones and even time lighting modes in different parts of your home. Another benefit of the four-in-one system allows you to control temperature, humidity and light levels depending on the ambient light intensity, and you don't even have to be present.

„Your house will look ‚lived-in' for the neighborhood, even if you're far away.“

The heart of the entire system is the intelligent server of Immax NEO. It allows you to control and communicate with each individual light source or groups of light sources from your phone, tab-let or by using the Immax NEO remote control. In just one smart gateway, more than a hundred smart bulbs or controls can be connected.

NEO is based on the tried-and-tested ‚ZigBee 3.0' technology, which represents the most advanced smart home solution. It is designed to be able to connect, in the future, all home electronics devices to just one, simple control system.

„Peace of mind begins at home.“

Immax NEO makes your home safe Whenever someone enters your home in your absence, the system will inform you immediately. One click can lock the door, set the alarm or draw the blinds. You may have a complete overview of what is happening in your home even though you are hundreds of kilometers away.
Part of the system can also include smart cameras that allow you to view and record realtime footage of your property.

At Immax NEO, we believe you will enjoy our progressive products and delight in a smart home management system that will greatly improve your quality of life and light up your home with all the colors of your imagination.

Fans **Fresco**

FRESCO is not only a very elegant addition to the interior, but also a perfect combination of lighting and refreshing the room. A fan with winter and summer operation. On hot summer days it refreshes the air, on cooler days the reversible operation of the blades stirs the warm air under the ceiling and can distribute the heat evenly throughout the room.

Filament

07088L and 07089L are the first intelligent light bulbs in Europe. They have the advantage of high rated luminous power with minimal power consumption. These design innovations bring back the atmosphere of classic tungsten filament bulbs. Light bulbs in modern and retro style chan-deliers can be used as well.

Smart home devices

Smart household with Immax NEO LITE

The Immax NEO LITE system is the most modern solution in the 'smart-home' field. Intelligent home control lets you control smart lighting, home camcorders, extension cords, televisions or air conditioning. You are always in control of everything on your phone and tablet.

The charm of the Immax NEO LITE lies in its ability to communicate effectively with any device. The system uses a WiFi networkand does not need a central unit. Thanks to this, it is also compatible with, and 'understands', the products of various manufacturers.

Safety first
The Immax NEO LITE system focuses primarily on home security. A clever outdoor camera protects the surroundings of the house from uninvited guests. A 360° viewing angle and two-way com--munication are the main advantages. It can be controlled via a smartphone, including the ability to record. You can find similar features with the video intercom. Even though you may be far from home, you still find out who is standing outside the door. Everything can be monitored using the integrated camera, which also offers motion detection. Two-way audio communication is a matter of course. The smart system of the garage door allows easy remote control. If you are approaching the house, just one click and the door will open. Plus, you'll always be sure you don't forget to close them afterwards. If someone attempts to manipu--lating them, you will find out immediately.

Remote control of electronic devices
Smart extension cords and electrical sockets are very useful pro-ducts that must not be missing in any household. Just co-nnect your electronic appliances via these devices and you can control and monitor them remotely. Thanks to the application,

you can also automate the activation of individual appliances and moni-tor energy consumption.
Not sure if you really turned off the iron? ll you have to do is open the application, check everything and, if necessary, simply switch off the socket to which the iron is connected - remotely. If you go away for a long time, set the lights on and off so that your house-hold does not appear abandoned and does not unnece-ssarily attract uninvited guests.

Communication with others
The basis of the Immax NEO LITE system is a unified language. It uses a local WiFi network for communication. All devices are then compatible with Amazon Alexa voice assistants, Apple Siri short-cuts, Google Assistant and more.

One application rules all
Individual products can be easily controlled using the Immax NEO PRO application. It is available on iOS and Android. Opera-tion is easy and the devices can be controlled using preset pro-grams.
Immax Neo Lite = WiFi

The device marked NEO LITE is an original device that you can control together with our lights with the same mobile application „Immax NEO PRO" and these devices can even be controlled without Bridge, only via your WIFI at home. If you connect NEO LITE devices in your home, you can conveniently monitor and control the connected devices with the Smart Immax NEO PRO application - remotely:

Immax NEO LITE Smart Security (Outdoor Indoor) camera 360° a useful and smart assistant that allows you to instantly see what is happening in your home using WI-fi. You can take a recording or photos from the monitored area whenever you need to. In the application settings, you can choose from a range of settings; for example, if the camera detects motion, an alarm is reported on your smartphone or tablet, you will be informed about visitors to your house, even the unexpected. Both (outdoor and indoor) cameras include a quality speaker and microphone, which allows two-way communication. It is necessary to be in range of the Wifi network at the place of installation of the camera.

Immax NEO LITE Smart doorbell - The intelligent doorbell allows for the best communication possible with the vi-sitor, even when you are not at home. If your smartphone is co-nnected to the Internet, whenever someone rings the doorbell, a notification will appear on your mobile phone with a picture from the video bell. With the help of a two-way intercom and a camera, you are able to manage everything you need for the visitor, thus reducing a lot of unnecessary worries. In the application, you can set automatic motion detection, ie. whenever the house bell de-tects move-ment, it takes a picture and sends the recording to you immedia-tely. The angle of view of the camera is 166°.

Immax NEO LITE Smart Extension lead 4AC+4USB, WiFi 1,5m – allows you to automate the activation of appliances on each socket separately or monitor consumption. A reliable extensi--on cord saves you time and energy. You have the possibility of immediate access to connected devices from virtually anywhere.

Immax NEO LITE Smart opening the garage door - Wireless ope-ning of garage doors or sliding gates based on WiFi technology. You are able to immediately check the opening or closing status. Open / close notification is also in the application.

Immax NEO LITE Smart IR remote control, WiFi
The IR controller is an infrared remote control with a built-in tem-perature and humidity sensor, which allows you to monitor and control the device from anywhere using the Immax Neo applica-tion. For your home appliances that support infrared transmissi-on, such as televisions, TV boxes, DVD players, air conditioners, fans, and other devices.

07707L 42 €
Extension lead

Immax NEO LITE Smart Extension lead 4AC+4USB
4 sockets operated separately
and 4 USB sockets
operated in bulk
Max. 3680W

WiFi **NEW**

07746L 25 €
Outdoor switch

Maximum current: 16 A (3680W)
Wireless range: 30 m direct visibility,
10 m in built-up area
Operating temperature: -20°C to 60°C
Degree of protection: IP68
↕ 135 mm x 62 mm ↔ 40 mm

Smart irrigation

07508L   **75 €**

Immax NEO Smart irrigation WiFi

Intelligent control of garden irrigation, irrigation and fogging mode. Water consumption detection and condition monitoring functions. Ability to set irrigation plans and create automation with other devices.
↕102mm x 45mm ↔154mm

07509L   **37 €**

Immax NEO Smart soil moisture and temperature sensor

The smart sensor monitors the soil temperature and humidity in real time.
↕135mm x 138mm ↔110mm

07510L   **104 €**

Immax NEO Smart irrigation system + soil moisture sensor, WiFi

Smart control of garden irrigation with humidity and soil temperature sensor. Irrigation and misting mode. Water consumption detection and condition monitoring functions. Ability to set irrigation plans and create automation with other devices.
↕102mm x 45mm ↔154mm

Wi Fi

07514L   **104 €**
Smart irrigation system, double, WiFi

Smart garden watering control, watering and misting
mode. Water consumption detection function
and status monitoring. Ability to set up watering
schedules and create automations with other
devices.

Wi Fi

07515L   **137- €**
Smart irrigation system, dual + soil moisture sensor, WiFi

Smart garden watering control, watering and misting
mode. Water consumption detection function
and status monitoring. Ability to set up watering
schedules and create automations with other
devices.

Immax SKY SMART a TABURET SMART

Do You want your Immax LED lighting to become an easy and very cheap SMART lighting system that you can control by voice or mobile application? All you have to do is connect it to a smart infrared remote control Immax NEO LITE Smart IR and you can use all smart functions without restrictions.

How to do it? All you have to do is get the Immax NEO LITE smart IR controller and connect it to the Immax LED lighting. Then you just install the Immax NEO PRO application on your mobile phone or tablet and you're done. The IR, which communicates with both devices, will take care of everything else. You will be able to use all fea--tures of smart home, even if you are tens of miles away from your home. You can read more about the benefits of smart lighting on page 1.
